
2. For each of the items listed under:
   a. **Supplement Type and Delivery Methods**
      i. Trough Space
      ii. Supplement Allowance
      iii. Supplement Form
      iv. Supplement Formulation
   and for each item listed under:
   b. **Animal-Related Factors**
      i. Exposure Time and Previous Experience
      ii. Individual vs. Group Feeding
      iii. Social Interactions

Indicate a way you could use that individual factor (i.e., trough space) in a practical situation to reduce variation in supplement intake, and to increase those animals that are meeting target supplement consumption.
